

SpeakUp June

Message from Kirsty Mitchell, HR Manager

Summer is here and with it comes our second heatwave of the year! I hope everyone is managing to stay cool whilst also enjoying the sunshine. Reflecting on the last quarter of the year, members of the team have been out and about building relationships and giving back to our local community. In April, 20 of the team, led by Nick Baldwin, Richard Frost and Bob Schulz, took part in two volunteering events supporting the Children's Respite Trust and marking International Earth Day. You can read more about these exciting events later in the issue.

The past two years have been particularly busy from an employment law perspective, with lots of changes going through parliament and more to come, which has kept HR departments busy across the country, myself included!

Lastly, I would like to extend a huge thank you to everyone who attended the OmniCALL Live launch event on the 11th June. The event, held at the Guinness Open Gate Brewery, London, saw consultants, end users and customers gather to experience OmniCALL firsthand and to ask any questions directly to the experts. The feedback we've received to date has been overwhelmingly positive and reflects the tremendous amount of hard work, dedication and collaboration that our teams so diligently provide to make events such as this a great success.

Enjoy the summer and happy reading!

UK Patent Granted for OmniCALL Technology

We're delighted to announce we've been granted UK Patent GB2605125 for our innovative dual-connection EVCs architecture, featured within the OmniCALL system!

This patented technology enables both loop wired and radial wired outstations to operate simultaneously on a single system, providing greater flexibility for designers, consultants and installers.

New EVC Controller for OmniCALL

The OmniCALL range features an intuitive touchscreen interface designed to simplify operation and improve the user experience. The modern display utilises the touchscreen microphone LCD display, providing clear system status information, straightforward navigation and easy access to key functions, helping users manage Emergency Voice Communication systems with confidence and efficiency.

OmniCALL BIM objects now available

BIM objects for the OmniCALL range are now available via NBS, helping streamline specification and project planning.

In addition, TM65 sustainability data is now available across the product range, providing valuable information to support environmental assessments and sustainable building design. TM65 data is available on request. Please get in touch with the team if you require further information.

Have your say: BS5839-9 rewrite

We are encouraging industry professionals to vote in support of a proposed re-write of **BS 5839-9**, to help ensure the standard reflects the evolving requirements of **Emergency Voice Communication systems in residential buildings**. Updating the standard is an important step towards improving guidance, supporting best practice and ensuring EVC systems continue to meet the needs of modern residential developments.

If you have access to the BSI Standards Development portal, please take a moment to vote in favour of the re-write and help support this important industry update. Registration for an account is quick and simple, if you've yet to create one.

Fire Safety Event Round Up

The Fire Safety Event proved to be yet another fantastic opportunity for the team to connect with industry professionals, prospective and existing customers, to discuss how we can support with future projects. A notable highlight of the event was the chance to demonstrate the capabilities of OmniCALL and discuss the advantages it provides installers with its two-core, non-polarity dependent system.

New Resources: Martyn's Law & Residential EVCs

Our website continues to provide valuable industry insight through a growing library of technical articles and guidance.

Recent additions include blogs covering **Martyn's Law** and the increasing importance of **Emergency Voice Communication systems in residential developments**.

These articles explore current legislation, best practice and key considerations for building owners, designers and installers.

Supporting our community

Members of the Baldwin Boxall team recently participated in two rewarding volunteering initiatives supporting the local community and this years' chosen charities.

During a litter-picking event at Walshes Park, volunteers collected an impressive 16.4kg of rubbish, helping to improve the local environment for everyone.

We also supported the Bluebell Walk at Arlington, organised by the Children's Respite Trust. Volunteers assisted with cafe duties and car parking management, helping to ensure that the event ran smoothly whilst fundraising for an important cause.

Thank you to everyone who gave their time and energy to support these worthwhile causes and make a positive impact on our local community.

Google Reviews

We're incredibly proud of the service we offer our customers and the feedback we receive is testament to this. We'd love to get the word out further and would really appreciate it if you're able to spare two minutes to leave us a [Google review](#).

Thank you in advance for your valuable input.
