TECHNICAL BULLETIN

BBTB Date:	**01 December 2021**
BBTB Number:	**BBTB-068**
BBTB Title:	**RPVS Firmware & Configuration Update**
System Description:	**Vigil Voice Alarm Systems**
Product(s) Affected:	**RPVS**
Reference:	**ECR4411**
Priority:	**2**

1 - Essential: Action is Recommended

2 - Important: Product Form / Fit / Function has been changed (may affect compatibility)

3 - General: For information / reference

4 - Obsolescence: Notification of Component or Product Obsolescence

DESCRIPTION

Baldwin Boxall has released updated versions of RPVS firmware (V1.07) and configuration software (V1.04).

CHANGE LOG

This is a bugfix release incorporating various updates:

- Bugfix to prevent spurious volume control settings being sent.

- SPEC4240 functionality added to set all zone bits when clearing a selected route, to overcome an issue on networked systems where the clear doesn't get propagated round the network unless it's an all clear.

- SPEC4240 option (see above) is now an option that can be set in configuration.

- Polling is now an option that can be set in configuration software.

SUGGESTED ACTION

No action required, this is a bugfix release. Please note however site wide firmware must match (i.e. all RPVS units on a given site must run the same firmware). If a replacement unit is supplied or an expansion is performed on an existing site then please ensure the firmware on the new module matches firmware on any existing units.
