  - 2 - Important:** Product Form / Fit / Function has been changed (may affect compatibility)
  - 3 - General:** For information / reference
  - 4 - Obsolescence:** Notification of Component or Product Obsolescence
- 

## OBSOLESCENCE STATEMENT

The BRX & BTX Simplex Transmit and Receive modules (for PA use only) are obsolete and will not be available for purchase from **14th November 2023**.

## WARRANTY & SUPPORT INFORMATION

We will still provide full technical & product support for existing systems using these products. Advance replacement items will still be available for the duration of the remaining warranty period of installed systems and we will continue to service and support these products for the lifetime of the system, subject to component obsolescence.

## ALTERNATIVE PRODUCTS FOR NEW INSTALLATIONS

Due to the obsolete technology employed in the BTX/BRX unfortunately there is no direct alternative product available.

The modules were originally designed for basic un-monitored PA network extensions, both technological and regulatory changes have rendered the units obsolete.

For new installations the VIGIL3 range of products provides the level of functionality required for an EN54 compliant VA system.

If you require any further information please feel free to contact us.
