

BBTB Date:	18 March 2024
BBTB Number:	BBTB-113
BBTB Title:	VIGIL3 Commissionator Release
System Description:	VIGIL3 Voice Alarm
Product(s) Affected:	VIGIL3 Commissionator
Reference:	ECR5382
Priority:	3

- 1 - Essential:** Action is Recommended
 - 2 - Important:** Product Form / Fit / Function has been changed (may affect compatibility)
 - 3 - General:** For information / reference
 - 4 - Obsolescence:** Notification of Component or Product Obsolescence
-

VIGIL3 COMMISSIONATOR SOFTWARE

From March 2024 all VIGIL3 VA/PA systems will be supplied with the VIGIL3 Commissionator tool that provides access to all the functions and settings required to successfully commission a correctly designed & assembled VA/PA system.

The VIGIL3 Commissionator enables competent engineers to perform the following tasks:

- Upload and Download of System Configurations
- Creating SD cards ready for installation into VIGIL3 Systems
- Access to Live Faults and download of Fault and Activity Logs
- Setting the System Real Time Clock (used for time stamping fault and activity logs)
- Altering System Input and Output Audio Levels
- Configuring System Surveillance Settings (Inputs and Speaker Lines)
- “Real Time” mode allows settings to be adjusted and then automatically distributed to the entire system, allowing commissioning settings to be adjusted quickly and easily.

If more comprehensive adjustments are required that are beyond the scope of the Commissionator tool then it is likely that system drawing, configuration or hardware updates may also be required. There may also be consideration to ensure the EN54-4 & EN54-16 compliance status of the system is maintained if applicable.

If more complicated changes are required during the commissioning process please contact our Sales department to discuss the options available.
