### FEATURES:

- Touchscreen control graphical user interface (GUI) available with monitor-mounted handset (BVOCTSPCM) or desk-mount handset (BVOCTSPCD).
- Straight-forward, site wide control of all outstations on the OmniCarePLUS network.
- Enables two-way voice communication to any activated remote with the ability for occupied remotes to be reset.
- When an outstation is activated, the topographical location of the outstation is indicated at the touchscreen control panel.
- Incoming calls from outstations are queued in incoming call order and calls from outstations are recorded.
- Ability to connect multiple touchscreens to the network with the ability to easily switch control.
- The touchscreen GUI connects to the digital network via a wall mounted Network Control Hub (pictured right). The control hub enclosure houses:
  - A digital signal processor (DSP) audio matrix to allow for communication to the digital network.
  - Backup batteries to provide system power in the event of a mains power failure - 24 hours quiescent and three hours at full operation.
  - Network control cards can be configured from the matrix's control cards using appropriate software.

### SYSTEM INFORMATION:

- Each power output is protected by a re-settable fuse rated at 2.5A.
- The digital network (including all outstations on the addressable loop) is fully monitored and any faults recorded in a time and date stamped log.
- Display resolution for the touchscreen GUI is 1080P.
- Product codes BVOCTSPCM/D includes touchscreen, network control hub (BVOCTSHUB) & backup batteries.
